

TT-02 Type-SRX Chassis Kit

Item No: 58720

GET UP CLOSE TO THE TT-02 Type-SRX Chassis Kit

TRF420 design suspension arms and uprights are employed, with double cardan drive shafts.

Dampers have 6 upper and 3 lower attachment position options.

The front direct coupling gives stable handling, and here is paired with durable, dedicated joint cups.

The rear oil gear differential features lightweight yet durable aluminum joint cups.

The kit comes with a hi-torque servo saver as standard, to help protect the servo and steering linkage from damage.

An aluminum propeller shaft is joined by propeller joints designed specially for use with the included plastic anti-wear caps.

Racy TT-02

This kit sees the versatile beginner chassis TT-02 paired with a host of Hop-Up Options and other parts to raise its racing ability and tuneability.

The efficient drivetrain employs a front direct coupling and double cardan drive shafts, with a rear oil gear differential. TRF420 design suspension arms give great feedback during your drive, and the rear suspension can be fine-tuned via its adjustable mount. Its 27T pinion and 68T spur gears give a gear ratio of 6.55:1.

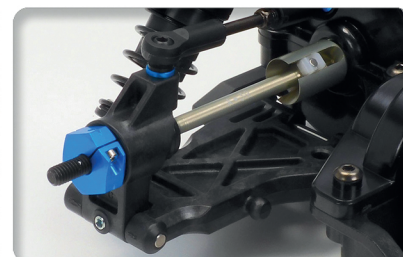

*Motor, tires, R/C equipment, battery pack and charger are sold separately.
